## PROFESSIONAL SUMMARY

Marine Biology graduate with hands-on experience supporting environmental monitoring programs, spatial data analysis, and stakeholder engagement across coastal and reef environments. Skilled in translating scientific data into clear, structured outputs that inform environmental decision-making. Comfortable working across field and office settings, collaborating with multidisciplinary teams, and delivering reliable, well-documented work to research and government partners. Seeking to contribute to WSP's Earth & Environment and Water teams as a graduate consultant.

## EDUCATION

---

### Master of Marine Biology (MSc) | Feb 2024 – Dec 2025

*James Cook University, Townsville, Australia | GPA: 5.07 / 7.0 (Credit Average equivalent)*

**Relevant Coursework:** Remote Sensing; Coastal, Estuarine and Mangrove Ecosystems; Marine Conservation Biology; Modelling Ecological Dynamics; Quantitative Methods in Science; Techniques in Marine Science 1 & 2; Evidence and Controversy in Marine Science.

**Award:** JCU International Excellence Award (Feb 2024).

### Bachelor of Zoology | 2019 – 2022

*Mahatma Gandhi University, CMS College (Autonomous), Kottayam, India | Overall Grade: A*

## PROFESSIONAL EXPERIENCE

---

### Environmental Research Intern

*James Cook University – Marine Biology & Aquaculture, Australia | Aug 2025 – Nov 2025*

- Contributed to the development of a long-term ecological monitoring framework for Pioneer Bay, integrating drone imagery, R-based mapping, literature synthesis, and on-site field validation to inform sampling design.
- Designed and managed a structured research library of peer-reviewed studies for the OIRS Long-Term Monitoring Program, supporting evidence-based decision-making for reef and coastal research sites.
- Created coordinate-based spatial datasets and produced reference maps in R, overlaying satellite imagery with sampling locations across Orpheus Island and the Palm Island Group.
- Assisted in designing permanent transects across reef-flat, mangrove, crest, and slope habitats, incorporating technical feedback from OIRS, AIMS, and JCU stakeholders.
- Conducted snorkelling surveys, reef walking, and camera-based transect swims, using GeoNadir drone imagery and GPS coordinates to evaluate site suitability.
- Produced a structured handover report and presentation outlining project progress, methodology, and recommended next steps for ongoing monitoring.

### Technical Trainee & Project Intern – Aquaculture & Hatchery Operations

*MPEDA–RGCA Multispecies Aquaculture Complex (MAC), Kochi, India | Jun 2023 – Nov 2023*

- Worked across hatchery and nursery operations for tiger shrimp, Asian seabass, GIFT tilapia, and pearl spot, supporting broodstock management, spawning, live-feed preparation, larval rearing, and water quality monitoring.
- Assisted with disease diagnostic procedures, early-stage culture management, and routine hatchery maintenance, contributing to operational reliability and biosecurity standards.
- Supported training sessions for undergraduate and postgraduate students, contributing to skill development and operational demonstrations.
- Invited to extend internship as Technical Trainee based on performance - strengthened teamwork, communication, and field discipline in a collaborative aquaculture environment.

### Casual Lecture Theatre Technician

*James Cook University, Townsville, Australia | Feb 2026 – Present*

- Provide technical support across multiple lecture theatres, including audio-visual setup, live troubleshooting, and rapid resolution of equipment issues during teaching sessions.
- Liaise directly with academic staff and students, demonstrating clear communication, problem-solving, and customer-focused service in a fast-paced, people-facing environment.
- Maintain reliability and professionalism under time pressure - skills directly transferable to client-facing consulting work.

## TECHNICAL SKILLS & TOOLS

---

- **GIS & Spatial Mapping:** ArcGIS (in progress); R (ggplot2, ggmap); GeoNadir drone imagery interpretation; satellite imagery analysis; coordinate dataset creation.
- **Data & Analysis:** Microsoft Excel, Word, Outlook; basic MATLAB; structured database development; literature review and synthesis.
- **Field Techniques:** Snorkelling surveys, reef walking, transect photography, habitat assessment, water quality testing, marine laboratory techniques.
- **Reporting & Communication:** Scientific report writing, technical documentation, stakeholder briefings, presentations.
- **Aquaculture & Lab:** Broodstock management, live-feed culture, larval rearing, hatchery and nursery operations, water quality monitoring.

## PROFESSIONAL ATTRIBUTES

---

- Stakeholder engagement and collaboration with research, government, and industry partners (OIRS, AIMS, JCU).
- Reliable, adaptable, and able to manage shifting priorities across field and office work.
- Curious, collaborative, and committed to continuous learning - values aligned with WSP's culture of inclusion, integrity, and innovation.
- Comfortable working in remote and physically demanding field environments.

## CERTIFICATIONS & OTHER

---

- First Aid & CPR Certified.
- JCU Coursework Academic Integrity Modules and JCU Respect Module completed.
- University of West London - Qualified Grade 5 in Electronic Keyboard.
- Australian driver's licence (in progress); valid Indian driver's licence currently held.
- Languages: English, Hindi, Malayalam.

## REFEREES

---

### **Patrick Millican**

Team Leader, Digital Space Service Delivery

*James Cook University, Townsville, Australia*

Phone: +61 7 4232 1232 | Email: patrick.millican@jcu.edu.au

*Relationship: Current Supervisor – Casual Lecture Theatre Technician*

### **Associate Professor Naomi Gardiner**

Associate Professor

*James Cook University, Townsville, Australia*

Phone: +61 7 4781 5721 | Email: naomi.gardiner@jcu.edu.au

*Relationship: Project Supervisor – Environmental Research Internship*
